

Mini-Berm

Secondary Containment

Used for clean-up operations and spill containment, the Mini-Berm is easily placed under valves and fittings, trucks, and machinery.

Features

- Constructed of durable fabric that is resistant to chemicals, fuels, oils, and acids.
- Compact and lightweight for storage and easy transport.
- Inexpensive.
- 14 standard sizes and custom sizes available.
- Easily cleaned and maintained.
- Designed to take standard size sorbent pads.
- Appropriate for containment of waste water, petroleum products, and various chemicals.

Options

- **Low-cost drain fitting:** can be opened to drain accumulated rainwater, or connected to a hose to pump out spilled product.
- **Over-fill protection:** allows precipitation to be drained while containing spilled chemicals.
